BRIGHTCHAMPS USA • Q4 2026 EXPANSION MANDATE

Scaling Inbound Volume to 5,500 Leads at $29.85 CPL via Geo-Marketing & Product-Tech

A Dual-Pillar Framework Combining Mutually Exclusive Geo-Targeting with Monotonic Meta CAPI & Instant Calendar Booking

Stakeholder: Yatharth Sahoo (Senior Lead, Founder's Office) | Author: Bharanee B (AI Associate, Founder's Office)

FOUNDER'S OFFICE EXECUTIVE CANVAS

Executive Strategy Canvas: Single-Source-of-Truth Scorecard

RECONCILED CORE SCORECARD (MODEL SINGLE SOURCE OF TRUTH)

Inbound Leads: 5,500 Leads (Nov: 2,500 | Dec: 3,000)

Blended CPL: $29.85 USD (Under $30.00 ceiling by -$0.15 buffer)

Total Media Spend: $164,175.00 USD (Under $165,000.00 ceiling by -$825.00)

Demos Scheduled: 3,723 Demos (67.7% booking rate via dynamic intake)

Demos Attended: 2,643 Demos (71.0% show rate via instant calendar lock)

Paid Students: 473 Students (17.9% demo close | 8.60% full funnel)

Net Booked Revenue: $367,550.00 USD (Exact sum of 3 tiers)

Revenue Less Spend: $203,375.00 USD (Net margin after digital media)

Assumed Gross Margin: 55.0% (Assumed: 40% mentor payout + 5% platform infra)

Contribution Margin: $37,977.50 USD (Profit after media & instructional delivery)

First-Order ROAS: 2.24x (Substantially exceeds 1.82x break-even ROAS)

Blended CAC: $347.09 USD per enrolled student

TOP 2 STRATEGIC RISKS & MITIGATIONS

1. Q4 Ad Auction Inflation: Retail CPMs surge 25%+ during BFCM. Mitigate via front-loaded Nov 1-18 pacing, strict $42 bid caps, and gift positioning.

2. Demo Timezone Bottlenecks: 62 demos/day clustered in 4:30-8:30 PM local slots. Mitigate with dedicated 16-mentor US pod across EST/CST/PST.

THE IMMEDIATE ASK FOR LEADERSHIP

1. Budget Approval: Authorize $164,175 media pacing ($74.6k Nov / $89.5k Dec).

2. Counselor Pod: Roster 16 dedicated US-shift mentors for peak 4:30-8:30 PM slots.

3. Holiday Voucher: Authorize $150 Black Friday/Holiday scholarship grant.

1. The Core Challenge: The Volume vs. Quality vs. Cost Trilemma

TRAP 1: THE CHEAP LEAD TRAP

$15 - $20 CPL

Meta lead forms optimized on volume attract low-intent clickers, grandparents with wrong numbers, or kids without laptops.

Result: Demo show rate collapses to <30%, burning sales counselor payroll and producing zero enrolled revenue.

TRAP 2: THE BOUTIQUE TRAP

$45 - $60 CPL

Hyper-narrow targeting on Silicon Valley engineers exhausts audience frequency rapidly and inflates auction CPMs.

Result: High trial conversion (25%+), but volume caps at <800 leads and blows past the $30 CPL mandate ceiling.

THE FOUNDER'S OFFICE SOLUTION

$29.85 BLENDED CPL

A Dual-Pillar Architecture:
• Mutually Exclusive 3-Tier Geo Matrix balancing $36 tech hubs with $24 heartland volume.
• Server-Side Meta CAPI with monotonic expected values + instant calendar booking (<=48h lag).

2. Pillar 1: Compliant Meta Targeting & Mutually Exclusive Geos

HOW DIASPORA & STEM TARGETING IS ACHIEVED ON META

Important: Ethnic affinity targeting is prohibited and unavailable on Meta. We achieve precision targeting via 3 compliant operational proxies:

1. High-Density Zip-Code Geo Clusters: Targeting premier STEM school districts with high concentrations of engineering families (Fremont 94539, Sunnyvale 94087, Frisco 75034, Edison 08820, Bellevue 98052).

2. Academic & Cultural Interest Proxies: Parents (30-55) indexing heavily on Kumon, Russian School of Math (RSM), Mathnasium, Singapore Math, USACO, First Robotics, and Chess.com.

3. 1% Lookalikes from US Customer Lists: Ingesting historical US paid customer seed lists (SHA-256 hashed parent emails/phones) to train Meta lookalikes.

MUTUALLY EXCLUSIVE 3-TIER GEOGRAPHIC MATRIX

Tier 1: Core Tech & Primary Metros (30% Vol | $36 CPL)

- SF Bay Area: Fremont, Sunnyvale, Cupertino, Dublin, San Jose
- Seattle Belt: Bellevue, Redmond, Kirkland
- DFW Tech Wedge: Frisco, Plano, Irving/Coppell
- NJ/NYC Metro: Edison, Iselin, Jersey City
- Austin Hub: Austin, Round Rock

Tier 2: Affluent Suburban Corridors (45% Vol | $29 CPL)

- North Atlanta: Alpharetta, Johns Creek, Milton
- RTP NC: Cary, Morrisville, Apex
- Chicago Suburbs: Naperville, Aurora, Schaumburg
- Northern VA: Fairfax, Ashburn, McLean
- Orange County CA: Irvine, San Diego North
- Houston Suburbs: Sugar Land, Katy | Boston: Lexington, Newton

Tier 3: Inland & Heartland America (25% Vol | $24 CPL)

- Non-metro Sunbelt, Ohio, Indiana, Michigan, Missouri, Kansas, Iowa, Wisconsin, Inland Pennsylvania.

3. Funnel Hypotheses to Validate: Operational Tier Economics

EMPIRICAL HYPOTHESES TO VALIDATE: All tier CPLs and conversion rates represent testable operational hypotheses monitored during Days 1-10.

Cohort / Parameter	Leads	CPL ($)	Spend ($)	Sched Rate	Show Rate	Close Rate	Net Revenue
Tier 1: Tech & Diaspora Metros	1,650	$36.00	$59,400.00	72.0% (1,188)	76.0% (903)	22.0% (199)	$169,150.00
Tier 2: Affluent Suburban Corridors	2,475	$29.00	$71,775.00	68.0% (1,683)	71.0% (1,195)	17.0% (203)	$152,250.00
Tier 3: Inland & Heartland America	1,375	$24.00	$33,000.00	62.0% (852)	64.0% (545)	13.0% (71)	$46,150.00
RECONCILED TOTAL / BLENDED	**5,500**	**$29.85**	**$164,175.00**	**67.7% (3,723)**	**71.0% (2,643)**	**17.9% (473)**	**$367,550.00**

MATHEMATICAL PROOF OF MANDATE RECONCILIATION:

- Blended CPL = (0.30 x $36.00) + (0.45 x $29.00) + (0.25 x $24.00) = $10.80 + $13.05 + $6.00 = $29.85 USD (Under $30.00 mandate).
- Exact Net Revenue Sum = $169,150 + $152,250 + $46,150 = $367,550.00 USD (Gross list $414,850 - $47,300 promo voucher dilution).
- Revenue Less Media Spend = $367,550 - $164,175 = $203,375.00 USD | Blended CAC = $347.09 per paid student.

4. Scenario Planning, Sensitivity & Break-Even ROAS Proof

Metric / Parameter	Downside (Stress)	Base Case (Target)	Upside (Outperform)
Blended CPL ($)	$34.33 (+15%)	**$29.85**	$26.87 (-10%)
Media Spend ($)	$188,801.25	**$164,175.00**	$147,757.50
Show Rate (%)	55.0% (Ghosting)	**71.0%**	76.0%
Enrolled Students	262	**473**	585
Blended CAC ($)	$720.62	**$347.09**	$252.58
Net Revenue ($)	$193,880.00	**$367,550.00**	$447,525.00
First-Order ROAS	1.03x	**2.24x**	3.03x
Contrib Margin ($)	-$82,167.25	**+$37,977.50**	+$98,381.25

BREAK-EVEN ROAS AT 55% GROSS MARGIN

Assumed Gross Margin: 55.0%
(40% mentor payout + 5% platform SaaS)

Break-Even Formula:
ROAS = 1 / Gross Margin = 1 / 0.55 = 1.82x

Base Case Delivers 2.24x ROAS, securing $37,977.50 in net contribution profit from Day 1.

VOLUME ALLOCATION SENSITIVITY

Tech Heavy (40/40/20): CPL $30.80 | Paid: 503 | Net Rev: $398k | ROAS 2.35x

Balanced Base (30/45/25): CPL $29.85 | Paid: 473 | Net Rev: $368k | ROAS 2.24x

Heartland Heavy (20/45/35): CPL $28.65 | Paid: 434 | Net Rev: $329k | ROAS 2.09x

5. Pillar 2: Meta CAPI & Monotonic Expected Values P(Paid)*ARPU

STRICTLY MONOTONIC CONVERSION VALUE CALIBRATION

Values represent mathematically expected downstream revenue P(Paid | Stage) x ARPU. Values strictly ascend down the funnel: Lead < Schedule < DemoAttended < Purchase.

Geo Cohort	Lead	Schedule	DemoJoined	Purchase
Tier 1: Tech/Diaspora	$102.33	$142.12	$187.00	$850.00
Tier 2: Suburban	$61.56	$90.53	$127.50	$750.00
Tier 3: Heartland	$33.53	$54.08	$84.50	$650.00
Blended Average	**$66.83**	**$98.72**	**$139.07**	**$777.06**

CAMPAIGN OPTIMIZATION CONFIGURATION

Primary Target: 'Schedule': Meta delivers optimal machine learning performance with >50 events/week/ad-set. 'Schedule' generates ~3,723 events (~108/week/ad-set), comfortably exiting learning.

Why Not 'Purchase'? 473 purchases over 60 days across 4 ad sets yields only ~3.5 purchases/week/ad-set—too sparse for Meta ML.

Value Signals: 'DemoAttended' and 'Purchase' stream via CAPI as offline conversion value signals to guide Target ROAS / Value-Based Bidding.

COPPA Privacy Guard: Zero minor data sent to Meta. Only SHA-256 hashed parent contact records (email, phone, state, zip) transmitted.

6. Dynamic Landing Page, SMS Verification & Reminder Cadence

SELF-REPORTED LAPTOP READINESS

Eliminates Device Penalty

Replaces mobile form penalty with self-reported field:

'Does your child have access to a laptop or desktop computer for the trial?'

Parents fill forms on smartphones while retaining home PC access.

MOCK TWILIO SMS OTP

Contact Integrity Gate

Parent phone numbers are verified via 6-digit SMS OTP (sandbox code 123456).

Structure mirrors Twilio Verify API for drop-in live deployment, eliminating fake VOIP entries.

TCPA CONSENT CHECKBOX

Legal Telephony Compliance

Explicit opt-in checkbox consenting to reminder calls, SMS, and WhatsApp alerts.

Clear disclosure that consent is not required for purchase, with opt-out mechanisms.

ATTENDANCE ASSURANCE

Multi-Channel Cadence

Confirmation screen establishes automated reminder schedule:

- T-24h: Calendar Invite via Email
- T-2h: 1-Click Zoom Link via SMS
- T-15m: Room Open Alert via WhatsApp
- Reschedule button eliminates ghosts.

7. Operational Capacity: Demo Distribution by US Time Zone

Time Zone Region	Volume Mix %	Daily Demos	Peak Local Hours	FTE Mentors Req
Eastern (EST)	40%	25 Demos/Day	4:30 - 8:30 PM	7 Mentors
Central (CST)	30%	19 Demos/Day	4:30 - 8:30 PM	5 Mentors
Pacific (PST)	30%	18 Demos/Day	4:30 - 8:30 PM	4 Mentors
TOTAL DEDICATED POD	**100%**	**62 Demos/Day**	**School-day Evenings**	**16 Mentors**

SALES COUNSELOR ROSTER & LOGISTICS

Daily Volume: 3,723 demos over 60 days requires conducting ~62 live 45-minute sessions daily.

Capacity Math: At 4 demos per mentor per shift, 62 demos requires 15.5 educators. A 16-mentor roster provides full coverage with a 15% surge buffer.

Timezone Shift Routing: Leads are routed dynamically based on parent phone area code and zip code to counselors in their matching timezone pod.

Weekend Morning Surge: Saturdays and Sundays feature 10:00 AM - 2:00 PM family slots to capture high-converting weekend demand.

8. Legal Compliance Architecture & Assumptions Register

REGULATORY & PRIVACY COMPLIANCE

TCPA (Telephone Consumer Protection Act): Mandatory explicit consent checkbox on Step 2. Clear disclosure that purchase is not conditional on consent, with one-click opt-out ('STOP').

COPPA (Children's Online Privacy Protection): Strict parent-facing intake gate. Zero child PII (name, age, grade) transmitted to Meta CAPI or ad networks; only SHA-256 hashed parent contact records.

Meta Minor Advertising Guidelines: Ad targeting configured strictly for Parents Age 30-55. Creative messaging emphasizes parental co-learning and academic enrichment.

ASSUMPTIONS REGISTER & VALIDATION TESTS

Blended CPL $29.85: High confidence | Source: Q3 US Meta benchmark | Validating Test: Day 1-3 pilot at $2.5k/day in Dallas & Bay Area.

Demo Show Rate 71%: High confidence | Source: Instant calendar lock + reminder cadence | Validating Test: First 100 scheduled slots Nov 1-4.

Demo Close Rate 17.9%: Medium confidence | Source: Senior US sales counselor pod | Validating Test: First 25 completed sessions.

Gross Margin 55%: High confidence | Source: Mentor payout ($30-35/hr) + SaaS COGS | Validating Test: Unit cost ledger audit.

9. First-10-Days Test Plan, Pre-Launch Checklist & Leadership Asks

FIRST-10-DAYS TEST PLAN & KILL CRITERIA

Days 1-3 (Signal Smoke Test): Pilot spend ($2.5k/day) in Bay Area & Dallas. Verify CAPI EMQ > 8.0 and slot sync.

Days 4-7 (Hook Calibration): A/B test 'Beyond Kumon' vs. 'Academic Logic Edge'. Calibrate ad-set CPMs.

Days 8-10 (Throughput Audit): First 200+ completed demos. Audit show rate and initial Stripe transactions.

KILL / PIVOT CRITERIA:

- Trigger 1: If Tier 1 CPL > $42 after 150 leads -> Shift 10% budget to Tier 2.
- Trigger 2: If Booking Rate < 55% -> Activate fallback 1-step sticky form.
- Trigger 3: If Show Rate < 60% -> Mandate manual phone check-in at T-4h.

PRE-LAUNCH CHECKLIST & DECISIONS NEEDED

[x] Meta CAPI Pipeline: Verified with SHA-256 parent hashing & monotonic event values.

[x] Mutually Exclusive Geos: Uploaded to Meta Business Manager.

[x] Landing Page Intake: Laptop access question, SMS OTP mock & TCPA consent live.

[x] Campaign Optimization: Configured on 'Schedule' with 'Purchase' as value signal.

DECISION 1: Budget Approval: Authorize $164,175 media pacing across Nov-Dec.

DECISION 2: Counselor Assignment: Confirm roster of 16 dedicated US-shift mentors.

DECISION 3: Holiday Voucher: Approve $150 tuition scholarship voucher for BFCM.
