BrightCHAMPS USA: Q4 Growth & Expansion Strategy

EXECUTIVE STRATEGY MEMO & TECHNICAL RUNBOOK • FOUNDER'S OFFICE (NOV–DEC 2026)

TO:	Yatharth Sahoo (Senior Lead, Founder's Office) <yatharth.sahoo@brightchamps.com>
FROM:	Bharanee B (AI Associate, Founder's Office)
DATE:	October 18, 2026
SUBJECT:	**USA Expansion: Scaling to 5,500 Leads @ $29.85 CPL via Geo-Marketing & Product-Tech**

1. Executive Summary & One-Page Strategy Canvas

BrightCHAMPS has mandated an aggressive Q4 expansion in the United States to generate 5,500 qualified leads across November (2,500) and December (3,000) at a strict blended Cost Per Lead (CPL) of $30.00 USD ('at the right cost') while maintaining premium lead quality.

We recommend deploying a Dual-Pillar Engine: (1) Geo-Segmented Marketing targeting high-propensity STEM families via compliant Meta proxies, balanced across premium tech hubs and cost-efficient suburban corridors, and (2) Product-Tech Automation with server-side Meta CAPI monotonic values (P(Paid | Stage) x ARPU) optimized on calendar bookings ('Schedule'), paired with dynamic intake that locks demos within <=48 hours.

> **[EXECUTIVE SCORECARD & IMMEDIATE ASK]**
> CORE SINGLE-SOURCE-OF-TRUTH SCORECARD:
> • Total Leads: 5,500 (Nov: 2,500 | Dec: 3,000) | Blended CPL: $29.85 USD (Under $30.00 ceiling)
> • Total Media Spend: $164,175.00 USD (Under $165,000 ceiling by -$825.00 buffer)
> • Demos Scheduled: 3,723 Demos (67.7%) | Demos Attended: 2,643 Demos (71.0% Show Rate)
> • Paid Enrolled Students: 473 Students (17.9% close | 8.60% full-funnel lead-to-paid)
> • Net Booked Revenue: $367,550.00 USD (Gross list $414,850 - $47,300 promo voucher dilution)
> • Revenue Less Media Spend: $203,375.00 USD | Assumed Gross Margin: 55.0% (Assumed)
> • Contribution Margin: $37,977.50 USD (After media & instructional delivery COGS)
> • First-Order ROAS: 2.24x (Break-Even ROAS: 1.82x) | Blended CAC: $347.09 per student
> • Upfront Cash Collected (M1): $275,662.50 USD (75%) | 30-60 Day Installments: $91,887.50 USD (25%)
>
> TOP 2 RISKS: (1) BFCM Ad Auction Inflation (mitigated by front-loaded Nov 1-18 pacing & $42 bid caps) and (2) Counselor Demo Bottlenecks (mitigated by dedicated 16-mentor US pod across EST/CST/PST).
> THE ASK: Leadership approval of $164,175 media plan, 16 dedicated US mentors, and $150 holiday voucher.

2. Pillar 1: Compliant Meta Targeting & Mutually Exclusive Geos

Compliant Targeting Mechanisms on Meta

Ethnic affinity targeting is prohibited and unavailable on Meta. We achieve precision targeting via 3 compliant operational proxies:

1. High-Density Zip-Code Geo Clusters: Premier STEM school districts (Fremont 94539, Sunnyvale 94087, Frisco 75034, Edison 08820, Bellevue 98052).
2. Academic & Cultural Interest Proxies: Parents (30-55) indexing on Kumon, Russian School of Math (RSM), Mathnasium, Singapore Math, USACO, First Robotics, and Chess.com.
3. 1% Lookalikes from US Customer Lists: Ingesting historical US paid customer seed lists (SHA-256 hashed emails/phones).

Mutually Exclusive 3-Tier Geographic Matrix & Empirical Hypotheses

To prevent internal auction self-competition, tier geos are strictly mutually exclusive and treated as testable operational hypotheses:

Cohort / Parameter	Leads	CPL ($)	Spend ($)	Sched Rate	Show Rate	Close Rate	Net Revenue
Tier 1: Tech & Diaspora Metros	1,650	$36.00	$59,400.00	72.0% (1,188)	76.0% (903)	22.0% (199)	$169,150.00
Tier 2: Affluent Suburban	2,475	$29.00	$71,775.00	68.0% (1,683)	71.0% (1,195)	17.0% (203)	$152,250.00

Corridors							
Tier 3: Inland & Heartland America	1,375	$24.00	$33,000.00	62.0% (852)	64.0% (545)	13.0% (71)	$46,150.00
RECONCILED TOTAL / BLENDED	**5,500**	**$29.85**	**$164,175.00**	**67.7% (3,723)**	**71.0% (2,643)**	**17.9% (473)**	**$367,550.00**

3. Pillar 2: Product-Tech Data Pipeline & Intake Funnel

Server-Side Meta CAPI: Monotonic Expected Values P(Paid | Stage) x ARPU

To overcome iOS 14.5+ pixel loss and train Meta on paying parents, our backend dispatcher (meta_capi_dispatcher.py) calculates monotonic values where downstream expected revenue strictly ascends:

• Tier 1 Values: Lead: $102.33 -> Schedule: $142.12 -> DemoAttended: $187.00 -> Purchase: $850.00
• Tier 2 Values: Lead: $61.56 -> Schedule: $90.53 -> DemoAttended: $127.50 -> Purchase: $750.00
• Tier 3 Values: Lead: $33.53 -> Schedule: $54.08 -> DemoAttended: $84.50 -> Purchase: $650.00
• Blended Defaults: Lead: $66.83 -> Schedule: $98.72 -> DemoAttended: $139.07 -> Purchase: $777.06
• Primary Optimization Config: Campaign is optimized on 'Schedule' (~3,723 events or ~108/week/ad-set, comfortably exiting Meta learning). 'Purchase' (473 events) and 'DemoAttended' are transmitted as offline Value Signals for Target ROAS / Value-Based Bidding (VBB).

Dynamic Landing Page, Verification & Reminder Cadence

• Self-Reported Laptop Readiness: Replaces mobile device penalty with explicit question ('Does your child have access to a laptop or desktop computer?').
• Mock Twilio SMS OTP: Validates 10-digit US phone numbers via 6-digit OTP (sandbox code: 123456).
• TCPA Consent Checkbox: Mandatory explicit consent for phone calls, SMS, and WhatsApp alerts.
• Attendance Assurance: Confirmation screen locks <=48h slots (1-click Google Calendar & Apple .ics) and displays automated reminder cadence: T-24h (Email invite & prep guide), T-2h (SMS Zoom link & mentor bio), and T-15m (WhatsApp alert), with a low-friction reschedule link.

4. Scenarios, Sensitivity & Break-Even Analysis

To ensure resilience against macro headwinds, we modeled three side-by-side scenarios at an assumed 55.0% gross margin (45% instructional delivery COGS):

Metric / Parameter	Downside (Stress Case)	Base Case (Recommended)	Upside (Outperform)
Blended CPL ($)	$34.33 (+15% CPM surge)	**$29.85**	$26.87 (-10% cost)
Media Spend ($)	$188,801.25	**$164,175.00**	$147,757.50
Demo Show Rate (%)	55.0% (Ghosting surge)	**71.0%**	76.0%
Enrolled Paid Students	262 Students	**473 Students**	585 Students
Blended CAC ($)	$720.62	**$347.09**	$252.58
Net Booked Revenue ($)	$193,880.00	**$367,550.00**	$447,525.00
First-Order ROAS	1.03x	**2.24x**	3.03x
Contribution Margin ($)	-$82,167.25	**+$37,977.50**	+$98,381.25

> **[FINANCIAL SUSTAINABILITY PROOF]**
> BREAK-EVEN ROAS PROOF AT 55% GROSS MARGIN:
> Break-Even ROAS = 1 / Gross Margin = 1 / 0.55 = 1.82x.
> Our Base Case achieves 2.24x ROAS, securing $37,977.50 in net contribution profit from Day 1.

5. Operations, Capacity, Compliance & Day-1 Test Plan

Demo Capacity by US Timezone

Generating 3,723 demos over 60 days requires conducting ~62 demos daily:
• Eastern (EST): 40% (25 demos/day | 4:30-8:30 PM local) -> 7 FTE Mentors
• Central (CST): 30% (19 demos/day | 4:30-8:30 PM local) -> 5 FTE Mentors
• Pacific (PST): 30% (18 demos/day | 4:30-8:30 PM local) -> 4 FTE Mentors
Total Capacity: 16 dedicated US-shift trial mentors handle full volume with a 15% surge buffer.

Legal & Platform Compliance

• TCPA: Explicit opt-in checkbox, disclosure that purchase is not conditional on consent, one-click opt-out.
• COPPA: Parent-facing intake gate. Zero child PII (name, age) sent to Meta; only SHA-256 hashed parent contact data.
• Meta Minor Policy: Targeting strictly on Parents (Age 30-55). Ad copy emphasizes parental co-learning.

Assumptions Register & First-10-Days Test Plan

• Assumptions Register: Blended CPL ($29.85, High Conf, Q3 Meta data) | Show Rate (71%, High Conf, <=48h lock) | Close Rate (17.9%, Med Conf, Senior counselor conversion) | Gross Margin (55%, High Conf, Mentor payout ledger).
• First-10-Days Plan (Nov 1 - Nov 10): Days 1-3 ($2.5k/day pilot in Dallas & Bay Area, audit CAPI EMQ > 8.0); Days 4-7 (Hook A/B tests 'Beyond Kumon' vs 'Academic Edge', ad-set CPM calibration); Days 8-10 (First 200 completed demos, audit show rate and Stripe payments).
• Kill / Pivot Criteria: (1) If Tier 1 CPL > $42 after 150 leads -> Shift 10% budget to Tier 2; (2) If Calendar Booking < 55% -> Activate fallback 1-step sticky form; (3) If Show Rate < 60% -> Mandate manual phone check-in at T-4h.

Pre-Launch Checklist & Decisions Needed from BrightCHAMPS

• Pre-Launch Checklist: [x] Mutually exclusive geos uploaded; [x] CAPI pipeline verified with monotonic values; [x] Primary optimization set to 'Schedule'; [x] Laptop readiness, SMS OTP & TCPA consent live; [ ] 16 US counselors rostered; [ ] Stripe holiday promo code active.
• Decisions Needed: (1) Authorize $164,175 media pacing across Nov-Dec; (2) Confirm 16 dedicated US-shift counselors; (3) Authorize $150 holiday scholarship tuition voucher.
